**Subject:** Other GenX info sent to OPA

When EPA issued the consent order, it based its toxicity assessment for GenX on the available toxicity data for GenX and for the analog PFOA (also known as C8). The consent order required that the company conduct additional toxicity testing on GenX. EPA has received that data and is reviewing it. It is updating its toxicity assessment using the more robust toxicity database specific to GenX.

Maria J. Doa, Ph.D.
